**Apple Media Services:
Schoolwork Collection for Teacher**

December 2021

File name Schoolwork Collections.csv

File description The data contained in the Access File represents data specific to a teacher that they have preserved as they use the Schoolwork app.

Why Apple keeps this information Apple retains this information on items the Teacher has preserved using Schoolwork handouts that have been archived into a collection

Field Name	Details
Collection	Information about the collection
Class ID	A class identifier
Collection ID	Identifier for the collection
Collection Type	Whether the collection is custom or archived
Date Class Created	The date and time on which the class was last modified
Date Created	The date and time on which the object was created
Date Last Modified	The date and time on which the object was last modified
Display Name	Display name from Apple School Manager
Collection Item	Stores a reference to the collection and the list of handouts and attachment IDs
Collection Item Type	Description of the type of collection item (e.g., handout or attachment)
Collection Reference ID	The reference identifier to the collection
Date Created	The date and time on which the object was created
Date Last Modified	The date and time on which the class was last modified
Item ID	Identifier for the list of handouts or attachments
Attachment	Attachments associated with a handout
App Bundle Identifier	An identifier of the application in which the attachment is associated
App Information	The application in which the attachment was created

Field Name	Details
App Reference Number	An identifier for the content in which the attachment is associated
Content Store Identifier	Identifier used to correlate the associated content with an item in the App Store
Context Path	Describes the attachment's context, if the attachment type is Schoolwork compatible
Context Type	Provides details on assignable content offered
Item ID	The attachment's identifier
Item ID Path	The location of the associated context within an application
Item Title	The attachment's user-facing name
Last Modified	
Open (can be handed in)?	Whether the attachment is locked
Parent Item ID	An identifier for the handout in which the attachment is associated
Permission Type	Describes the student's permissions given from the attachment
Sharing Method	The method in which the attachment is shared with students
Type	The attachment's type grouping
URL	The attachment's URL
Handout	A message for students, which may consist of announcements, reminders, instructions, assigned activities, or requests for work
App Information	The application on which the handout was created
Date Created	The date and time on which the handout was created
Due Date	The date and time on which the handout is due
